## Easy Cooking Demos by Leilah Krounbi

Cooking healthy delicious food from the garden does not have to be complicated. Come learn simple recipes and try free samples!

## Preserving the Harvest by Kelly Frank

Want to enjoy summer's delectable homegrown treats year round? Learn basic canning, freezing, and drying techniques, and get some favorite canning recipes to try at home.

## Basic Foraging: Eat Your Yard by Rebecca Gray, Certified Herbalist, ME

Learn how to identify plants that are good to eat, in your garden, back yard, or in the wild! This workshop includes basic foraging safety and specifics of several useful herbs, weeds, or wild plants.

## Companion Planting by Oona Holcomb

Increase your harvest by pairing plants that grow well together! Oona will take you on a tour of her garden and teach you how to maximize your space while increasing your yield.

## Composting for Gardeners by Liz Burns, M.C. and Wayne Gottlieb, M.C.

Composting is easy and fun! Learn how to start your garden or home composting system with wire bin and barrel techniques.

## Vermicomposting by Anna Cone, M.C.

Vermicomposting is a system that uses worms to quickly break down organic material. Learn how to start your own efficient vermicompost!
